Spanish Society of Health Informatics

WG Website

1. Achievements – IMIA WG Events and projects conducted, and publications completed

IMIA HIS WG has published an article in IMIA Yearbook 2022: "Desiderata for a New Generation of EHRs for Inclusive Healthcare".

2. Describe WG/SIG Participation - Engagement and participation in IMIA, IMIA Region or member health informatics events and activities in the past year.

A scientific collaboration with the EFMI Translational Health Informatics WG has been initiated as of September 2022. A series of virtual meetings, a foundational face-to-face meeting (visit of the IMIA HIS WG Chair to the EFMI THI WG Chair to Genova on October 10, 2022), and two other face-to-face meetings at the EFMI STC 2022 and MIE 2023 Conferences have been developed. A joint publication on the research roadmap on components and standards for the secondary use of EHR data in Health research is being worked on.

3. Provide details of the WG/SIG’s Outreach - Recruitment and engagement of new members and target communities, publicity, and representation at major events and/or on social media.

The Chair used the LinkedIn web page we created for communication with the WG community of interest to solicit collaboration in group activities, with limited results. Currently, the web page has 63 members, most with a history of collaboration in IMIA. Using the mailing list available, the Chair has sent
a call for the renewal of interest in continued membership in the Group. Also, interest in attracting new members to the Group has been announced on the LinkedIn community.

4. **Current List of members:**

There is no access to an official list of WG members managed on the IMIA website. A mailing list is available and will be updated in the next few days.

**List of New Members Joined during: 07, 2022 - 06, 2023**
