

Class of IAHSI - 2020

Angelina Kouroubali

Dr. Angelina Kouroubali is a Collaborating Researcher at the Computational BioMedicine Laboratory and a research expert at the Centre for eHealth Applications and Services at the Institute of Computer Science, Foundation for Research and Technology-Hellas (FORTH). She is the coordinator of FORTH's four star reference site ecosystem in the European Innovation Partnership on Active and Healthy Ageing (EIP AHA). She holds a Ph.D. in Management of Health Information Systems from the Judge Business School, University of Cambridge, UK, a Masters in Medical Informatics from Columbia University, NY, USA, and a Bachelors in Biology from Bard College, USA.

She is an expert in digital health with more than 20 years of professional experience in the field. She has several peer reviewed scientific publications and has been a speaker in highly visible eHealth events. She is involved in research and innovation activities such as analysis, comparison, and optimisation of national and regional healthcare systems in the context of personalized medicine, digital applications for patient reported outcomes, social care digital systems for the management of home care, social inclusion and support of the elderly, advanced systems for the management of perioperatives stress in patients undergoing elective surgery, digital innovation apps, electronic health records (EHR), standards, certification and quality assurance, integrated care, interoperability and governance, prehospital emergency care, and the management of organization, complexity and change in health care.
