

## **Class of IAHSI – 2019**

### **Heather Leslie**

Dr Heather Leslie is the co-lead of the Clinical Modelling Program at the openEHR Foundation and principal of Atomica Informatics. She spent 15 years in clinical practice before transitioning to health informatics in 1995. MD, FRACGP; FACHI; FIAHSI. She pioneered the openEHR clinical modelling methodology and development of the CKM tool used for information model and community governance. Her advisory and training activities to national programs and international projects focus on design and clinical verification of health information models and data set specifications; clinical knowledge governance; and clinician/domain expert engagement.
