

## Class of IAHSI - 2022

**Lei Liu**

Dr. Lei Liu is a Prof. of Biomedical Informatics in School of Basic Medical Sciences and the Director of the Institute of Intelligent Medical Imaging Diagnosis and Medical Informatics in School of Data Science at Fudan University in China. He obtained his Ph.D. of Cell Biology from University of Connecticut in 1997 and continued his postdoctoral training in computer science at the same school. Since 1999, he had worked as the Director of Bioinformatics at the University of Illinois at Urbana-Champaign until returned to China in 2007. His research areas include Big Data in Biomedicine, Precision Medicine, and Medical Artificial

Intelligence. He published more than 100 scientific research papers, and conducted several major research projects of biomedical informatics as the leading scientist in China. He actively involved in international collaboration in health informatics. He is one of the co-chairs for OHDSI China chapter. He organized workshops and conferences to promote global collaboration on health science informatics.
