

## Inaugural Class of IAHSI – 2017

### **Ramin Moghaddam**

Dr. Ramin Moghaddam is recognized internationally for being a visionary strategist and executive leader. He is an experienced, passionate, and self-motivated Founding President of world-class initiatives and organizations with more than two decades of demonstrated history of working and leadership in the ICT industry in different business domains including but not limited to e-Health, e-Insurance, e-services, telecommunication, and in different sectors including Academia, Government, and Industry at national, regional, and international levels.

He is skilled in large-scale Information Systems design & deployment; project team leadership and orchestration among multidisciplinary parties; strategic planning; and business process improvement. He has received several recognitions and awards because of deployed large-scale information systems which brought more than USD 100 million of savings per annum.

He founded the Middle East Association for Health Informatics (MEAHI) in 2002, which received approval for being the IMIA Middle-East chapter from the IMIA General Assembly in Hiroshima in 2009. He served as IMIA vice president for the MEAHI region during 2010-2017. He also founded the Iranian Medical Informatics Association, which became the first national member society to IMIA from the Middle-East region in 2003. In recognition of his vision and leadership, he was awarded the "IMIA Honorary Fellowship" in August 2017.

Dr. Moghaddam has been a very results-oriented, motivated, and visionary technopreneur professional since he was 18 years old. He graduated with IT Degrees from Bath University and the Royal College of Surgeons of Edinburgh, UK, after his graduation with a Medical Doctorate Degree from a leading medical university, Shahid Beheshti University of Medical Sciences, in Iran.
