

Class of IAHSI - 2021

Stefan Schulz

Stefan Schulz, trained as MD, holds a doctorate in Theoretical Medicine from University of Heidelberg and is Full Professor of Medical Informatics at Medical University of Graz. His research has focused on clinical language, ontologies and terminologies. He provides support to standards development for SNOMED International and serves the German company Averbis in the role of head of medical research in several large research networks, which use text analytics for secondary use of clinical data.
