

Class of IAHSI - 2023

Daniel Vreeman

[Dr. Daniel Vreeman](#) is a physical therapist, biomedical informatician, and expert in health data standards. His work aims to create a global health ecosystem where data is available with open standards that unlock the potential for information systems and applications to improve health decision-making and care. Dr. Vreeman is the Chief Standards Development Officer at HL7 International where he leads the development of standards to advance health data interoperability. He previously served as the Senior Clinical Data Standards Lead at RTI International. From 2006 to 2019, he was the Director, LOINC and Health Data

Standards with the Regenstrief Institute, Inc. and the inaugural Regenstrief–McDonald Scholar in Data Standards at the Indiana University School of Medicine.
